**SAVE THESE INSTRUCTIONS
READ ALL INSTRUCTIONS BEFORE USING THIS MACHINE**

WHEN USING ELECTRICAL EQUIPMENT, BASIC PRECAUTIONS SHOULD ALWAYS
BE FOLLOWED, INCLUDING THE FOLLOWING:

WARNING – TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK, OR INJURY

1. Do not leave machine when plugged in. Unplug from outlet when not in use and before servicing.
2. Do not use outdoors or on wet surfaces.
3. Do not allow to be used as a toy. Close attention is necessary when used by or near children.
4. Use only as described in manufacturer's Instruction Manual. Use only manufacturer's recommended attachments.
5. Inspect cord for damage before each use. Do not use with damaged cord or plug. If machine is not working as it should, has been dropped, damaged, left outdoors, or dropped into water, return it to the manufacturer or authorized repair center.
6. Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run machine over cord. Keep cord away from heated surfaces.
7. Do not unplug by pulling on cord. To unplug, grasp the plug not the cord.
8. Do not handle plug or machine with wet hands.
9. Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair, and anything that may reduce air flow.
10. Keep hair, loose clothing, fingers, and all parts of body away from openings and moving parts.
11. Turn off all controls before unplugging.
12. Do not use the Lliberator to clean stairs.
13. Do not use to pick up flammable or combustible liquids such as gasoline or use in areas where they may be present.
14. Do not use to pick up anything that is burning or smoking, such as cigarettes, matches, or hot ashes.
15. Do not use for picking up health-endangering dust such as asbestos.
16. Do not use as a wet vacuum.
17. Do not use without filters in place.
18. Connect to a properly grounded outlet only. See Grounding Instructions.
19. This machine is to be used with HOST® carpet cleaning products only. Use of other cleaning products may damage this machine.

This machine must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be inserted into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

WARNING: Improper connection of the equipment-grounding conductor can result in the risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the machine. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

This machine is for use on a nominal 120 volt circuit, and has a grounded plug that looks like the plug illustrated in **Diagram A**. A temporary adapter that looks like the adapter illustrated in **Diagram B** may be used to connect this plug to a 2-pole receptacle as shown in **Diagram C** if a properly grounded outlet is not available. The temporary adapter should be used only until a properly grounded outlet can be installed by a qualified electrician. The green colored rigid ear, lug, or the like extending from the adapter as illustrated in **Diagram B**, must be connected to a permanent ground outlet box cover. Whenever the adapter is used, it must be held in place by a metal screw as shown in **Diagram C**.

Note: In Canada, the use of a temporary adapter is not permitted by the Canadian Electrical Code.
